

AIA NORTH CAROLINA
2010 **COTE DESIGN AWARDS**
DESCRIPTIVE DATA

Entry #

The purpose of the AIANC COTE Award is to recognize well-designed projects by AIANC members that exemplify the COTE Measures of sustainability (found at: www.aia.org, search keyword: COTE.) In addition to the standard submission requirements of the AIANC Design Awards, AIANC COTE awards should be marked for inclusion and must include a description with key environmental features, and narratives responding to specific categories, indicating an understanding of the connections between them. Selection favors well-designed solutions that exhibit an integration of natural systems and appropriate technology quantifying features when possible (using suggested metrics), verification through building systems modeling, analysis, and best practices. Please limit your responses / descriptions to the pages formatted with this Descriptive Data form.

DESCRIPTIVE DATA

Project Name: _____

Completion Date: _____

Location of Project: _____

Architect's AIANC Section Membership: _____

Short Description of Project: (100 words or less)

Architect's Statement Concerning Design Program and Solution:

Type of Construction (Materials, Engineering Systems and Other Pertinent Technical Information):

Lessons Learned:

Project Economics:

Process Details:

Results:
